

## ENGINEERING

You know your business and we take the time to learn from you 'what you do' and 'how you do it'.

This includes a site visit to see your working factory. By seeing your workplace we can help to give risk management advice to reduce the risk of accidents as well as arranging the elements which your business really needs.

From precision engineers, press workers and foundries to metal fabricators, polishers and plastic trades, we can support a wide range of businesses. We also work with those in specialist sectors such as automatic, aerospace and offshore.

Our dedicated brokers have built up a wealth of knowledge and experience so our bespoke packages are built around the unique characteristics of the industry including sub-contractors and tiered supply chains.

We provide trusted, impartial advice that will keep your business secure and protected in the face of the many challenges businesses experience.

“We have dealt with Gravity Risk Services for 2 years, this being our 3rd renewal term. We have found Gravity to be professional and helpful at all times. Ritchie has promised and delivered everything he and Gravity have said. We have very good cover at very competitive rates and now insure our two factories and our fleet of cars and vans with Gravity. Keep up the good work guys and we look to continue our working relationship with you”.

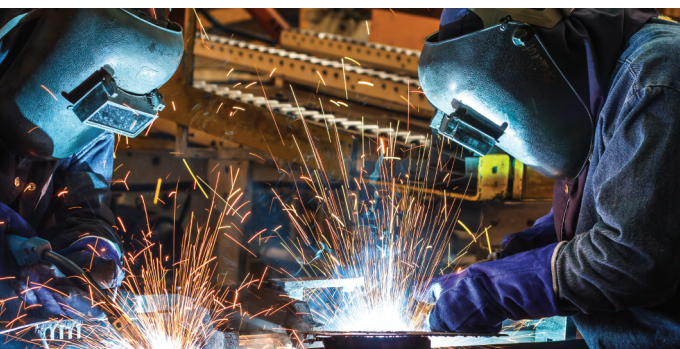

**Rob Bahra, Director, Star Polishing and Plating Company**

We provide solutions to a range of covers including:

- Buildings
- Business interruption
- Theft
- Goods in transit

We can also protect elements of the running of your business such as:

- Equipment and stock (including customers')
- Mechanical breakdown
- Employers' liability
- Public liability insurance
- Product recall
