

4-STEP APPROACH

Gravity take a 4-step approach to reviewing a company/individual's insurance arrangements.

1 VISITING YOUR BUSINESS/PROPERTY

A Gravity Account Executive will visit you to understand your personal and/or business risks. One of our experts will conduct a **full site survey** to ensure we know what you do and how you do it and agree with you a set of review objectives.

2 ANALYSE EXISTING COVER

We then take a look at your existing programme of covers and compare that to what we think you **actually** require. We assess the adequacy and suitability of your current covers compared to your business risks.

3 GO TO INSURANCE MARKET

We find the **best deal** with **competitive terms** from the **right insurers**, based on **what you need**, rather than what you've got. We provide underwriters with quality risk information from the site surveys we conduct, which gives a **far greater opportunity for increased savings**.

4 REPORT THE OUTCOMES

We present our review outcomes to you, demonstrating how we have met your review objectives and the recommendations from the technical audit.

Unlike automated internet insurance providers, we get to know you and understand your needs.
